DETAILED ACTION

Election/Restrictions

- 1. Applicant's election without traverse of the invention of Group I in Paper No. 4 is acknowledged.
- 2. Claim 4 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 4.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

4. Figures 1-4 should each be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Notice of Informal Examiner's Amendment

"nd" (claim 1, line 5) has been changed to – end --.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 1744

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over 6. Baumbartner (USP 2,558,334) in view of Cansler (USP 5,786,087). The patent to Baumgartner discloses a brush comprising a plurality of synthetic bristles (11) "each having a diameter of the order of four-thousandths of an inch and having pointed ends with a taper of approximately 15 to 1" (column 1, line 54 thru column 2, line 2 and fig 5) and having a length of about 9/16 inch (column 3, lines 12-15). Although a longer taper is preferred. Baumgartner also discloses that the length of the taper of 8 to 1 have been found satisfactory for a lacquer brush (column 3, lines 70-72). With a "taper length" as defined by Baumgartner (column 3, lines 67-70), (15 times as great as the diameter of the bristles), the taper would start about 1.5mm (claims 1 and 3) from the end thereof (15x,004x25.4). As Baumgartner states that the bristles (11) taper to a point, it would have been obvious to one of ordinary skill to have made the tip as narrow as claimed (.02mm in claim 1 and .01mm in claim 2). The recitation of "toothbrush" fails to define over the structure of the prior art and pertains only to the intended use thereof. The patent to Baumgartner discloses the invention substantially as claimed with the exception of the recited materials, although it suggests that various synthetic materials could be used (column 3, lines 18-24). The patent to Cansler discloses the use of PBT as a bristle material (column 4, lines 39) in a brush of similar utility as Baumgartner and which also suggests the equivalence of nylon and PBT. It would have been obvious to one of ordinary skill to have modified the bristles of Baumgartner as such since it has been held to be within the general skill of a worker in the art to select a known material

on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited patents are pertinent to brushes having tapered bristles, with Kweon and Ito et al disclosing detailed dimensions thereof.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Spisich whose telephone number is (703) 308-1271. The examiner can normally be reached on M-Th (6-3:30), Alternate Fri off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert J Warden can be reached on (703) 308-2920. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
